

Motorcycle Noise Enforcement

Presented for Information

January 21, 2016

Inspector Dennis Storey

Outline

1. Background of Noise Enforcement

2. Enforcement Results

3. Challenges

4. Questions

Background

- In 2010, EPS trained approximately 27 members on the Quest 3M type II Sound Level Meter.
- This was a Canada-wide initiative.
- Quest 3M is the only court-approved, noise reading instrument.
- It is only approved for motorcycles.

Enforcement Violation

	2012	2013	2014	2015
Noise	223	253	257	175
Helmet	34	36	34	25

Challenges

- EPS has limited members approved to operate the instrument, of which a majority are in Major Collision Investigation Unit (MCIU).
- With a significant increase in the number of fatal and serious injury collisions, enforcement time is down.
- The Quest 3M is limited to motorcycles only and cannot be use on any other type of motor vehicle, at this time.
